

Health, safety, and environment policy

SEA is committed to working responsibly and will never knowingly compromise our health, safety, security, or environmental standards to meet our work objectives. Our goals are to ensure the safety of everyone involved in our operations and to protect the environment by:

- Encouraging open and honest communication with employees, clients, contractors, and stakeholders;
- Providing appropriate resources to ensure a safety working environment for staff and contractors;
- Maintaining high quality documented systems and processes and training staff and contractors in their use;
- Seeking ways to continually improve our performance by monitoring objectives/KPI, auditing, reviewing, monitoring, and reporting;
- Assessing and managing risks in the workplace and giving staff and contractors the right to stop the job if any unsafe condition or act is identified;
- Maintaining clean, safe, and healthy workplaces;
- Investigating and learning from any incidents to prevent reoccurrence;
- Planning and preparing for potential emergencies;
- Seeking external certification of key elements of our management system;
- Meeting or surpassing statutory requirements.
