Inspections you can trust

Our technical inspection department is accredited by the Czech Accreditation Institute according to ISO/IEC 17020:2012 for the inspection of straight and coiled steel tubes.

Competence you can rely on

SEA Inspectors have proven competence, with a high level of certification and experience built up over many years. Inspectors have an impressive range of NDT and welding certifications, such as Level 2 AT, DT, ET, LT, MT, PT, RT, UT, VT as per ISO 9712 (EN 473), certified by TÜV NORD Czech, International Welding Inspectors (IWI-S), and painting and coating certification to FROSIO 17024.

Creativity

SEA designed and built its own pressure test bay and the testing and calibration laboratory is accredited to ISO 17025 to perform destructive burst-testing for seamless tube manufacturers.

Cost effective flexible solutions

SEA has a global reach with 24/7 availability. We conduct second and third-party inspection, and expediting services worldwide for seamless tube manufacturers.

SEA has attractive pricing options covering daily, weekly, monthly, resident, and desk inspections.

Impartial, independent feedback

We provide experienced inspectors providing feedback you can rely on and solutions you can trust.

We report facts based on data.

Trust us, we are inspectors

SEA are in a unique position to offer professional inspection services with vast experience in working with duplex and super duplex tubes. Our expert SEA inspectors tailor services to meet the schedule determined by the ITP.
